

# Family Computer and Internet Safety Agreement

.....  
Child's signature

Parent's signature

Date

We want to use the computer and internet safely in our family and have agreed to set up a contract.

## Child's Agreement

I understand that using the computer is a fun and educational way to use my time and that the internet is a public place. To stay safe online I need to use the computer and the internet responsibly. I will:

### S(Safe)

- keep my personal information (name, address and phone number) to myself and not share it with others
- not send photos or videos of myself over the internet without checking with my parents first
- keep my passwords secret from everyone, except my parents

### M(Meeting)

- never meet an online friend in real life unless I tell my parents first and they come with me

### A(Accepting)

- only open emails and attachments from people I know
- not fill in forms online that ask for money or personal details

### R(Reliable)

- only download things with my parents' permission
- think twice about the things I see on the internet and try to decide if they are true

### T(Tell)

- tell my parents straight away if some asks me to do something I don't like
- tell my parents straight away if I see or receive something on the internet that I don't like

## Parent's Agreement

I understand that my child will use the computer for entertainment and education and that the internet is a public place that is very useful for my child. I wish to help my child stay safe when using the computer and the internet. I will:

### Empower

- take an interest in what my child is doing on the computer and encourage them to use it wisely
- listen to any problems my child has on the computer and understand that things can happen by mistake

### Educate

- learn ways my family can stay safe online
- teach people in my family how to use the computer responsibly and stay safe online

### Supervise

- Supervise my child when they are using the computer and when they are online
- Find out where my child uses their computer and make sure they are protected when using the internet away from home

### Technology

- Install safety software on the home computer to keep my family safe
- Only allow computers to be used in a family area of the house, not in bedrooms

# Computer and Internet Safety House Rules
